

## Phoenix Hydro-X Xtreme Xtractor Part # 4025600

### Patented Suction Roller Provides Both Suction and Compression

The Phoenix Hydro-X Xtractor is the most effective and efficient extraction tool on the market today. The Hydro-X Xtractor's patented Suction Roller provides both suction and compression — forcing water to the surface then sucking the water away, not allowing the water to be reabsorbed back into the carpet and pad. No other extractor today can pull as much water from the carpet and pad as the Hydro-X Xtractor.

The Hydro-X Xtractor is steerable and self-propelled with variable speeds. One restoration technician can operate the unit and extract a 1200 sq. ft. structure with carpet and pad in under 2 hours!

#### PRODUCT FEATURES

- Patented suction roller
- Self-propelled with positive chain drive – no belts to break or adjust
- Variable speed for every carpet and pad condition
- Extracts in both forward and reverse
- Rust and corrosion resistant stainless steel construction

#### PRODUCT SPECIFICATIONS

<b>Size</b>	17"W x 52"H x 20.5"D
<b>Weight</b>	70 lbs
<b>Power</b>	2.5 amps; 110-120 VAC grounded
<b>Speed</b>	0-28 FPM, forward or reverse
