

## Phoenix Hydro-X Vacuum Pac Part # 4025601

### Superior Suction Power

The Phoenix Hydro-X Vacuum Pac outperforms the competition by its ability to apply all of its suction power at the source, pulling more water than any other restoration extraction vacuum tool on the market today.

The Vacuum Pac, with its patented, portable design and high-end technology, has two powerful vacuum motors that can generate maximum suction. And because it is portable, the Vacuum Pac can be hand-carried anywhere in a structure. Truckmount units must stay outside the structure, and every foot of hose deducts 1 cfm of vacuum power. When combined with the Hydro-X Xtractor, the Vac Pac can apply all of its suction power right at the source of the water, losing no cfm unlike a truckmount that may use 24, 50 or 100 ft. of hose.

#### PRODUCT FEATURES

- Portable – applies all of its suction power at the source
- Dual vac motors
- Rust and corrosion resistant stainless steel construction
- Industrial vacuum and water pump
- Can be used separately from the Hydro-X Xtreme Xtractor

#### PRODUCT SPECIFICATIONS

Size	16"W x 26"H x 13"D
Weight	74 lbs
Power	13.5 amps – Vac Motor 4.5 amps – Pump Motor 120V 60 Hz
Suction Rating	10" of vacuum
Filters	Washable lint bag
