

LANDFILL BIODEGRADABLE

Landfill Biodegradable nitrile glove uses a unique formulation but maintains the same physical properties as regular nitrile

4 MIL NITRILE

Forest green, powder free nitrile offers superior strength with excellent resistance to punctures and tears, chemically resistant to oils, solvents and grease

9.5" ROLLED CUFF

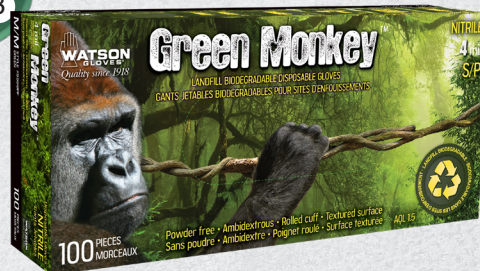

Rolled cuff prevents liquid from getting inside the glove and adds extra strength to the cuff

LIGHTLY TEXTURED PATTERN

Lightly textured pattern provides a *sure-grip* in oily and wet applications

ADDITIONAL

100 gloves per dispenser

HOW IS GREEN MONKEY LANDFILL BIODEGRADABLE?

Regular nitrile disposable gloves take more than 200 years to breakdown. Watson Gloves Green Monkey™ nitrile disposables will break down in only 8-11 years due to an additive in the nitrile formulation. Green Monkey™ nitrile gloves have the same performance properties as regular nitrile disposables. Biodegradation only begins when the gloves are discarded in landfills conditions (ASTM D5526 – low heat, high pressure, limited oxygen, no light and low moisture). Once the biodegradation process begins, the additive in the Green Monkey™ nitrile disposables will ensure that they do not just break down into smaller plastic pieces, but are actually converted to biogas like other organic materials. ASTM D5526 shows up to 26.5% biodegradation in 390 days.
