

Fogmaster Tri-Jet Fogger Part # 6208

The time-proven Fogmaster Tri-Jet® 6208 fogger serves the needs of a wide indoor and outdoor application. Food plants, hotels, barns, parks and hospit examples of sites which depend on the Fogmaster Tri-Jet for effective treatm

This pioneering unit, now in its fourth decade of service, provides the standa which other foggers are measured. It's in daily use for such diverse applicati odors, disinfecting and sanitizing, carpet mildew control, flood and fire dama controlling mosquitos, flies and other insects, dispensing water for humidific and a host of innovative applications.

The portable 6208 is a "cold fogger" -- it handles both water- and oil-based s one-turn control knob to adjust particle size and degree of misting. The dispe calibrate in the field to compensate for differences in liquid density or viscos

The Tri-Jet fogging head can be adjusted at up or down angles as required. M aluminum, it's lightweight, but tough enough to justify its five-year limited wa

PRODUCT SPECIFICATIONS

Size	15.4" H x 12.5" H x 8.6" D
Weight	12 8lbs
Power - Motor	1 Hp, 120 VAC 50/60 Hz, 7 Amp
Tank Capacity	4 Liters
Chemicals	Handles both oil- and water-based chemical solutions (Liquid viscosity and density affect particle size distribution)
Particle Size	15-30 micron
Liquid Flow Rate	0-10 oz/min
Fogging Nozzle	Three counter-rotating vortex nozzles
