

Fiberlock Kontrol Kube TopSlider Uni-Frame Part # 6540

The Kontrol Kube's durability is as impressive as its functionality partially thanks to the innovative frame design. Unlike other containment options, the Kontrol Kube is built with an adjustable yet solid aluminum frame.

The ratcheted height adjustments enable the user to have maximum control while the bolt action pole systems offer a smooth transition. Each of the poles are equipped with spring loaded locking mechanisms that fit securely into rubber gaskets giving the Kontrol Kube superior flexibility with uneven ceiling surfaces.

Product Features

- Bolt action pole system
- Height adjustment for maximum user control

PRODUCT SPECIFICATIONS

Weight	40 lbs.
Frame Construction	Solid Aluminum
