

Fiberlock IAQ 6000 Mold Resistant Coating Part # 8360

Fiberlock IAQ 6000 is a white, tintable mold-resistant coating for professional use, that contains an EPA-registered, broad-spectrum fungicide to prevent mold growth on the surface of the cured film. Fiberlock IAQ 6000 is a durable, flexible, and permeable 100% acrylic water-based coating that can withstand the moist, humid conditions present in environments conducive to mold growth.

Fiberlock IAQ 6000 has been tested by independent and certified laboratories to prove resistance to mold growth on the surface of the coating, and has successfully passed both ASTM G-21 and ASTM D-3273 mold resistance testing with the highest scores possible. Fiberlock IAQ 6000 is recommended for use on wood, plaster, wallboard, sheetrock, concrete, masonry block, primed metal and galvanized metal. Fiberlock IAQ 6000 can also be used on new structural materials to help prevent mold growth during building construction.

Product Features

- Designed for mold remediation
- Contains EPA registered fungicide
- Tested by independent laboratories
- Prevents mold on the cured film surface

PRODUCT SPECIFICATIONS

Size	5 Gallon
Appearance	White
Odour	Slight
PH	1.3
Evaporation Rate	Slower than Ether
