

Vaportek Vaporshark Odour Control System PART#90-0950/5

The Vaportek VAPORSHARK is a simple-to-use, portable electric system that quickly, safely and effectively neutralizes odour in areas up to 50,000 cubic feet. The Vaportek VAPORSHARK uses Vaportek's patented essential oil filled membranes that release a non-toxic, odour-neutralizing dry vapour into the air. This pairing technology emits a penetrating vapour that quickly controls and eliminates malodours from smoke, sewage, mould, blood and body fluids and biological odours trapped in the air, building structure and contents, so the odour does not return. Based on proven technology developed for use in medical facilities, the Vaportek VAPORSHARK sets a new health and safety standard in odour neutralization. The VAPORSHARK membranes are effective for 270 hours and are intended for applications where quick results are desired. The VAPORSHARK should always be placed at the highest point in the treatment area to ensure maximum benefit. No ozone, no PPE, no evacuation or recovery period is necessary with Vaportek technology.

PRODUCT FEATURES

- Treats area up to 50,000 cubic feet
- Use with VAPORSHARK membranes, S.O.S for fire and smoke, 3X Industrial for all other applications, Lemon can be used with 3X Industrial membranes
- Ships with 1 box of 5, 3X Industrial membranes
- Use immediately to combat psychological odours and throughout the job to penetrate structure and the contents to eliminate malodour
- Safe for staff and clients in treatment areas, No Ozone, NO PPE

PRODUCT SPECIFICATIONS

Product Code	90-0950/5
Electrical requirements	120 Volts
Treatment area	50,000 cubic feet
Weight	6.0 kg (13 lbs)
Dimensions	41x21x43cm (16"Hx8"Wx17"L)
Xactimate code VAPORSHARK	CLN DODRME>
Xactimate code Membranes	CLN DODRM (per membrane)
