## Phoenix AirMax Radial Air Mover

**4035000**

The new Phoenix AirMax is a radial air mover with outstanding performance (925 CFM and 1.9 amps), as well as many superior features, including its exceptional ergonomics and compact size. The AirMax Radial Air Mover is the most compact low profile design on the market. The unit is 8-7/8" tall, 17" wide, 20-1/2" and weighs a mere 21 lbs.

21 lbs.  
925 CFM  
1.9 Amps

**Xactimate® Code: WTRDRY**

## PHOENIX AirMax Radial Air Mover

The Patent Pending X-Bracket is the most precise and durable motor support available today. The X-Bracket not only provides a less restrictive inlet for greater total airflow, but also allows the motor and electrical assembly greater clearance from the wet surface. It is also simple to remove for easy cleaning and sanitizing of the fan housing. And, of course, the stacking features on this fan are best-in-class.

### AirMax Superior Features

- Smallest on the market
- Best-in-class stacking and cord wrap
- Nested stacking saves 3/4" per unit
- Solid, Integrated handle for bookshelf stacking
- 925 CFM, 1.9 Amps
- All Stainless Fasteners (no rust)
- GFCI protects the unit and everything plugged into it
- Robust Polypropylene Housing
- Easy to clean – The top, motor, and all electronics lift out
- Better airflow underneath and around the AirMax
- No "airflow dead spot" in front of the unit
