

# ShuBee® Waterproof Shoe Covers

C SB CA WP

ShuBee® Waterproof Shoe Covers are the BEST universal shoe cover option on the market. They save the floors from most elements you can encounter on the bottom of your shoes. The material is made out of a textured plastic that we designed with a “grit” texture to make sure they maintain a skid resistance on surfaces.

Our Waterproof Shoe Covers can combat mud, dirt, rain, sleet, ice and snow. No matter which makes it on the sole of your boot or shoe, our Waterproof floor savers will keep it contained. in the shoe cover.

We made sure to include many color options; Red, Dark Blue, Light Blue, Bright Green, Yellow, Orange, Pink, and Black. Clients use the colors to make sure their clients see them going the extra mile. Some use colors as a way of managing cross contamination in environments where different areas need to be completely contained. These clients choose certain colors for certain areas to make sure they can easily spot the ones who do and don't belong. No matter the reason- ShuBee® Waterproof Shoe Covers are a step above the rest.
