

PROTECT WITH DENTEC

CAP STYLE

- **Top-Impact & Penetration Protection** - Certified to CSA Z94.1 Type 1 and meets ANSI Z89.1 Type I standards.
- **Exceptional Comfort & Balance** - Lightweight design with an ergonomic suspension system for a secure and balanced fit. Engineered to minimize torque and reduce neck fatigue.
- **Unique Swivelling 4-Point Ratchet Suspension** - Provides a custom, snug fit with minimal pressure points. Allows for micro adjustments to fit all head sizes. Same suspension used in all LIDGUARD® hard hats.
- **Advanced Ventilation** - Suspension system includes ventilation ports at the forehead to enhance breathability and reduce heat buildup.
- **Rain Trough** - Channels rain to the peak of the hat. Prevents it from dripping down your neck.
- **Brow Pad** - Made from a unique polyurethane foam material that absorbs perspiration and is replaceable. Same brow pad used in all LIDGUARD® head protection products including cap, fullbrim safety helmets and bump cap.
- **Accessory Slots** - Universal side slots accommodate earmuffs, face shields, and other PPE.
- **Chin Strap Compatible** - Attachment points allow secure use in climbing or elevated environments.
- **Factory Installed 4-Point Chin Strap** - Cap and fullbrim are available with a 4 point chin strap with quick connect and release buckle. See page 6 for picture.
- **Short Peak & Trim Profile** - Improves upward visibility and fits tight spaces.
- **Reverse Headband Certified** - Wear forward or backward for added flexibility when you reverse the headband 180° in the shell.
- **Lightweight** - Providing all day comfort and reducing neck strain.
- **Made in Canada** - Proudly manufactured to meet stringent safety and quality standards.
- Ideal for construction, utilities, mining, foundry, oil & gas, heavy industry and any application where protection from falling objects is required without lateral impact coverage.

FULLBRIM

- **Top-Impact & Penetration Protection** - Certified to CSA Z94.1 Type 1 and meets ANSI Z89.1 Type I standards.
- **Sleek, Ribbed, Low-Profile Design** - Delivers excellent balance and a secure, stable fit.
- **Full Brim Coverage** - Provides extra protection from environmental hazards like sun, rain and falling debris.
- **4-Point Swivelling Ratchet Suspension** - Unique design adjusts for maximum comfort and personalized fit. Allows for micro adjustments to fit all head sizes. Same suspension used in all LIDGUARD® hard hats.
- **Advanced Ventilation** - Suspension features ventilating ports at the forehead to keep the wearer cool in hot environments.
- **Brow Pad** - Made from a unique polyurethane foam material that absorbs perspiration and is replaceable. Same brow pad used in all LIDGUARD® head protection products including cap, fullbrim safety helmets and bump cap.
- **Accessory Slots** - Compatible with a wide variety of face shields, earmuffs, and other PPE.
- **Chin Strap Compatible** - Attachment points allow secure use in climbing or elevated environments.
- **Factory Installed 4-Point Chin Strap** - Cap and fullbrim are available with a 4 point chin strap with quick connect and release buckle. See page 6 for picture.
- **Incredibly Comfortable** - Engineered with long-wear comfort in mind for full-day use.
- **Lightweight** - Providing all day comfort and reducing neck strain.
- **Great Balance** - Distributes weight evenly to reduce neck fatigue.
- Proudly **Made in Canada**, the LIDGUARD® Fullbrim Helmet is ideal for construction, utility, forestry, oil & gas, and any industry where top-only impact protection and extended coverage are critical.

Type 1 4-Point Ratchet Suspension CSA Z94.1 Type 1 | ANSI Z89.1 Type I | Class E, G, C

Made in Canada

Available with or without Chinstrap

Engineered for all-day comfort and designed for protection against top-only impacts, the Type 1 LIDGUARD® Cap Style Helmet delivers lightweight comfort and secure fit for overhead work environments.

Designed for stability and full-coverage protection, the LIDGUARD® Fullbrim Hard Hat provides enhanced protection from sun, rain, and debris. Ideal for outdoor or high-risk applications.
