

Infrared Drying Product IRP 400

INTRODUCING NEW INFRARED HEATING PANELS FOR SPECIAL DRYING SITUATIONS

Infrared panels directly heat affected wet materials and not the air. Infrared heat waves transfer energy and enhance evaporation more efficiently than traditional heaters. They are silent and do not emit any airflow. Our Infrared panels will raise the temperature of materials 30-50 degrees Fahrenheit, consuming only 3.5 amps!

DRYING USES

- Drywall (single or multi-layer)
- Lathe and Plaster
- Concrete Floors and Walls
- Gypcrete®/Lightweight Concrete
- Stone and Masonry
- Ceramic and Porcelain Tile
- Structural Framing
- Wood Subflooring
- Exterior Sheathing

NOT RECOMMENDED for drying finished wood, carpet & pad, sheet vinyl, paper, cardboard or other combustible materials.

Specifications

Handling Dimensions	46" x 16" x 1" @ 10 lbs each
Shipping Dimensions	48" x 24" x 4" @ 30 lbs (SET OF 2)
Power	110-120v
Amperage 3.5 amps	3.5 amps

Item	Description
IRP 400	Infrared Drying Product

Features

- ▶ **2 pack of Infrared panels**
- ▶ **400 watt consumption / 3.5 amps**
- ▶ **Detachable legs / feet for stabilizing and spacing**
- ▶ **7' power cord**
- ▶ **Stainless steel constructed frame**
- ▶ **Place parallel to walls to dry them**
- ▶ **Silent operation**
- ▶ **Place face down to dry floors**
- ▶ **Basic operating - plug into standard 115v outlet**
- ▶ **1 year warranty**
