QUICK CONNECT
CONNECTIONS

Inspection | Full HD

Easily see what you normally can't see with the Airbot One high resolution camera (1080P). The inspection tool that fit your needs.

Cleaning

Cleaning large organisations ducts will be faster, better and more professional.

Coating (optional)

Airbot One is the perfect tool for coating, protecting and painting inside ducts.

THE ULTIMATE ROBOT

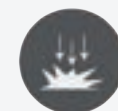

min. duct size : 7"x7"

The Airbot One is the ultimate robot that specialists in air duct cleaning need. With its belt system propelled by 2 high performance motors, it is able to move quickly and efficiently in ducts without any worries. Its design allows it to access all types of ducts of 7 "and more in order to inspect, clean and even apply sealants.

FUSIONFLEX™

The FusionFlex™ technology created by LTE Canada allows the robot to be used up to 100 feet away. This technology consists of a cable for the air supply as well as the connection of the various electric cables ensuring supply and control of the robot. With quick connectors, this innovation will ensure that cables do not mix and clean easily.

Replacement cable | 100 feet

AIRBOT-CABLE

250 Psi Air Hose

Quick connect wire cable

From the robot to the carrying case, we are committed to ensuring quality and durability. Our Canadian Nanuk™ hard case is waterproof, shockproof and dustproof. It is completely legal to carry your hard case like a " Carry-on " on the plane. The size and security of the hard case are permissible at an airport for your outside contracts.

L.T.E Canada is committed to safety, that's the reason why we have installed a key switch and a safe compressed air's connection inside the hard case. A complete control panel allows easy control of the robot.

*Each hard case holds a serial number.

CONTROL PANEL

The AirBot One comes with a complete and easy-to-use control panel integrated in a transport case for the robot itself. That way you can control direction, motor speed, lights, dual camera set, coating kit speed and more. It's ignition switch allows you to leave the workplace and make sure the robot is safely shut off. The control case is built to view and record video either on a laptop or on a portable screen.

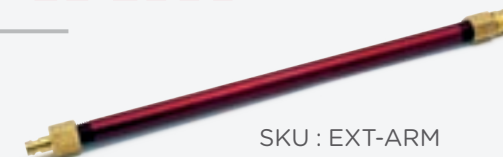

CAMERA SOFTWARE

The AirBot One is built to be used with a provided software or any recording software. We provide with each robot a preset laptop with NCH Debut software with a full-time licence. This software allows you to view, record and even take pictures including timestamp and add text through your keyboard.

EXTENSION ARM

A 12 inches extension for the Airbot One's arm. Perfect for cleaning large industrial ducts and reach high places.

SKU : EXT-ARM

BRUSH-KIT™

Our brush kit is the most resistant brush system on the market. You can count on the reliability of this system thanks to its powerful air motor and high quality brushes. The height is easy to adjust thanks to its Canadian made articulated arms. All the equipment has been designed to meet the specific needs of cleaning ventilation ducts.

INCLUDES

- ✓ Adjustable arm and mount
- ✓ Pneumatic rotating motor
- ✓ 3 brushes size (12", 24", 36")

12" REPLACEMENT BRUSH

APPLICATION

SPRAY-KIT™

360 DEGREES

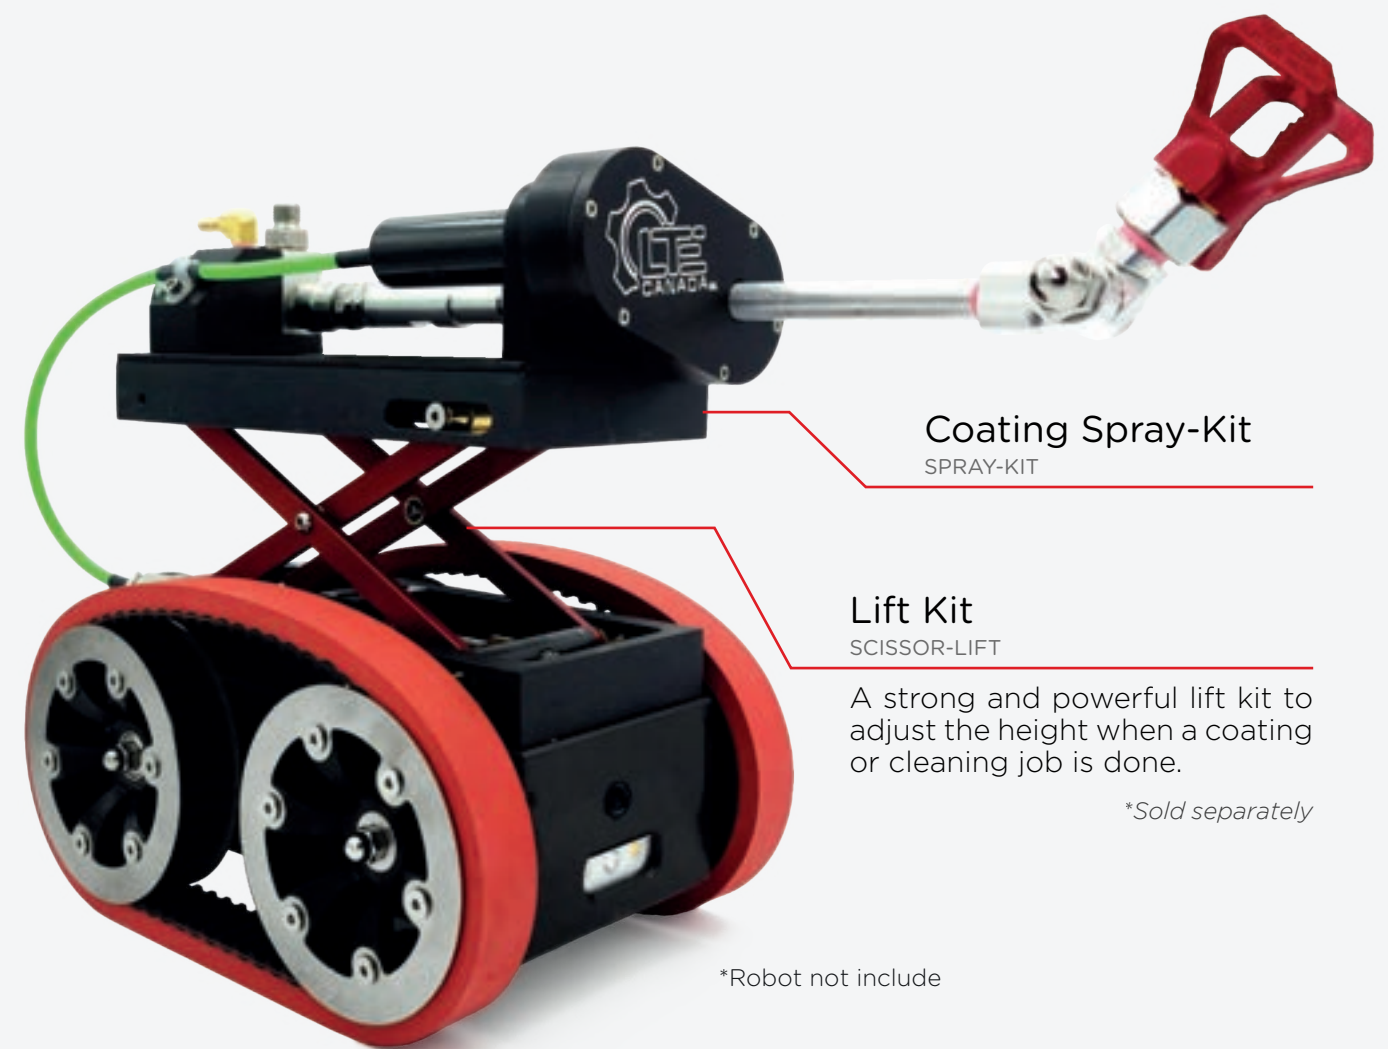

A perfect option for extra income. A kit that will save you an incredible amount of time with its rotating nozzle of 360 degrees. A high-quality motor allows the rotation of the nozzle while the robot is in motion. Quality and speed of operation are our primary mission.

The advantage of the SPRAY-KIT is the ease of use as well as the cleaning at the end of each job. The system is in one piece only.
