

V-SERIES® Fall Harness Line

Product Comparison

The MSA V-SERIES® Harness Line offers exceptional comfort to help you focus on your work, not your harness.

All V-SERIES harnesses feature a unique racing style buckle, ensuring a snug and comfortable fit while enhancing flexibility with an athletic cut. The athletic cut helps increase flexibility by contouring the harness to the body for improved upper torso movement on the job. Each harness also has a pull-down adjustment that will allow you to quickly get the right fit.

V-FORM® Harness

The V-FORM Harness **sets the standard** as a full body safety harness that allows you to focus on your job—not your harness.

V-FORM+® Harness

The V-FORM+ Harness **advances the standard** with a dedicated attachment point for PFLs allowing for a quick and easy attachment.

V-FIT® Harness

The V-FIT Harness **raises the expectations** with aluminum hardware and a removable conforming shoulder pad.

V-FLEX® Harness

The V-FLEX Harness is **changing the game** with a thermoform shoulder pad designed for cooling and integrated suspension trauma straps.

WE KNOW WHAT'S AT STAKE.
