

## SPECIFICATIONS

Voltage:	115
Phase:	Single
Hz:	50/60
Amps:	19.6
Vacuum Pressure /Hg:	90 Water Lift
Air Movement (cfm):	258
Filter Area (ft <sup>2</sup> ):	18
Filter Efficiency:	99.97% @ 0.3 microns
Noise Emission (dBA):	70
Inlet:	2"
Weight:	94 lb
Length:	27 3/4"
Width:	21 1/2"
Height:	49"

## DUST COLLECTOR ACCESSORIES

- 80039: Vacuum Splitter
- 3474-200900050: Conical Pre-Filter
- 402037: HEPA Filter
- 3477-201000590: 2 1/2" to 3" Connector
- 3476-1376013: Longopac

## FEATURES

- The 3474-L is equipped with two independently tested and certified HEPA filters with a minimum efficiency of 99.97% at 0.3 microns.
- The manually purged jet pulse filter cleaning system efficiently purges the pre-filter within the filtration chamber. This provides consistent airflow and minimizes dust collection hazards.
- The corrosion resistant steel secures the filtration chamber during operation and transportation.
- The pre-filter cleaning system has a cone shaped filter which holds 18 square feet of media.
- It is designed for quick recovery of bulk dry dust, debris, abatement residue and common job site materials.
- This dust collector, operating at a low decibel rating, can work in occupied spaces such as hospitals, schools, offices and government facilities.
- This dust collector engages two commercial grade motors operating at 258 CFM. It is designed for small to mid-sized (16"-18") planetary grinders, 110 volt 8" shot blasters and hand-held edge grinders.
- A steel handle allows simple mobility at congested job sites while the 10" rear wheels guide the dust collector smoothly over power cords and random obstructions.
- This unit ships with a twenty five foot dust collection hose, two piece wand and a swivel floor tool attachment.
- There is a one (1) year manufacturer's warranty on parts and labor.
