

POG MICRO OZONE GENERATORS

Changing the Way Ozone Machines are Valued

Current Ozone generators are: Dangerous, Heavy, Expensive, Fragile, Damaging. Ozone has been without innovation in over 20 years. POG is the leader in ozone technology from start to finish; changing the way ozone is used and delivered, manufacturing safer generators, and making it easier and cost effective. The POG ozone generators work on a trickle method – this is a safer, and easier alternative to blasting large amounts of ozone into a space.

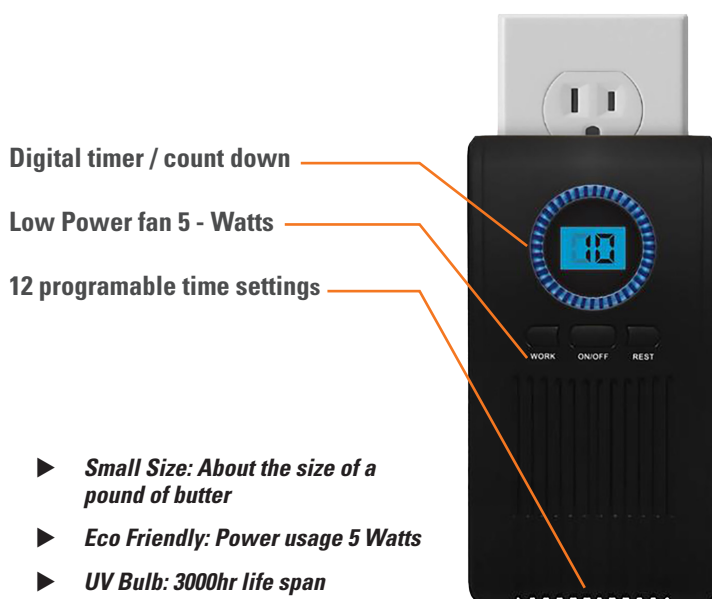

THE POG - **PORTABLE**

- ▶ **Small Size:** About the size of a pound of butter
- ▶ **Battery life:** Approximately 9 hours per charge.
- ▶ **Battery Bank:** Doubles as a charger for phones or other small devices
