

PROFIT BUILDING APP!

MINIMIZE LABOR. MAXIMIZE PROFIT. MAKE MOLD GOLD!

IN YOUR TYPICAL MOLD REMOVAL JOBS:

- Are you capturing all product costs with a job?
- Do you budget for consumables?
- Do you have well defined profit targets for jobs?
- Are all of your estimators hitting your profit targets?
- Are you minimizing your labor costs?

Would you like to answer yes to all of the above?

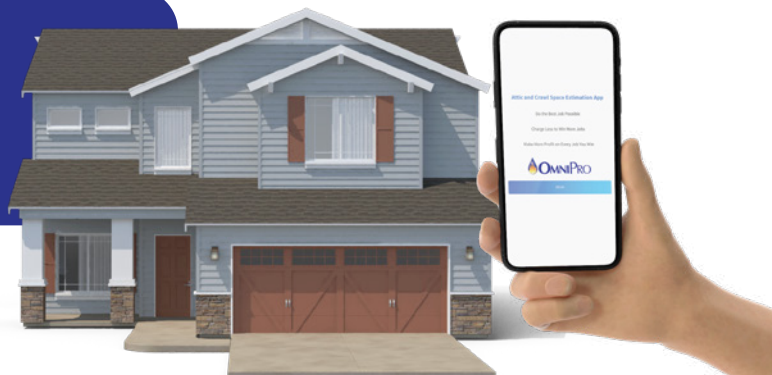

To learn more about the OmniPro Mold System App, visit the following site to watch a short video: <https://bit.ly/moldprofit>

THE OMNIPRO MOLD SYSTEM APP CAPTURES:

- ✓ All product costs for cleaning, removing stains, and preventing mold regrowth
- ✓ A solid estimate for consumables such as gloves, filters, suits, tape, poly, etc.
- ✓ Your company's labor rate
- ✓ A comparison of labor needed to do the job in one day vs two based upon product selection
- ✓ Your company's target profit margin
- ✓ A total estimate for the square foot of the job
- ✓ A per square foot job estimate
- ✓ A comparison of profitability for a one day vs two day approach
- ✓ An estimate of yearly revenue and profits based on your teams and number of mold jobs they could do

The App is not a replacement for programs like Exactimate. It is a tool to use on the driveway once the job has been scoped out. Have your team deliver an estimate you are confident in during that first visit.
Save time. Win Jobs. Drive Profits!
