

## ZipWall® 12' Spring Loaded Pole Part# SLP2

Each ZipWall® SLP2 package contains two 12' aluminum Spring Loaded poles (SLPs), and accessories. Use them to create a temporary dust barrier of any length in minutes without the use of tape, staples or ladders. That saves time and costly repairs to painted surfaces and will increase customer satisfaction. Consider this example: A 30 foot long 11 foot high barrier takes about 1 hour to build using conventional methods. With the ZipWall® SLP2 system, the same barrier can be completed by one person in under 5 minutes.

The ZipWall® SLP2 Dust Barrier System is patented and has many advantages over conventional methods. The twist-locking pole lets you raise the sheeting without a ladder. The non-skid, non-marking material at the top grabs the ceiling, while the non-skid GripDisk under the foot keeps the pole locked in position at the floor. Spring Loading lets you lift the pole to tuck the sheeting underneath for easy setup. It also maintains constant tension on the barrier, to compensate for movement at the ceiling or at the floor if the poles are bumped, or if there is a lot of air movement.

### PRODUCT FEATURES

- Pro-quality/durability; provides dust-tight seal at the ceiling without tape or staples
- Height ranges from 4-feet 7-inches to 12-feet; accepts sheeting up to 8 mils thick
- Weighs 1.5lbs ea.
- Each SLP2 package 2 SLP poles, 2 heads, 2 plates, 2 tethers, 2 Grip Disks
- Accepts sheeting up to 8 mils thick
- Meets strict ANSI certification for quality
