

ZipWall® 12' Spring Loaded Pole Part# SLP6

Each ZipWall® SLP6 package contains six 12' aluminum Spring Loaded poles (SLPs), and accessories. Use them to create a temporary dust barrier of any length in minutes without the use of tape, staples or ladders. That saves time and costly repairs to painted surfaces and will increase customer satisfaction. Consider this example: A 50 foot long 11 foot high barrier takes about 2 hours to build using conventional methods. With the ZipWall® system, the same barrier can be completed by one person in under 10 minutes.

The ZipWall® Dust Barrier System is patented and has many advantages over conventional methods. The twist-locking pole lets you raise the sheeting without a ladder. The non-skid, non-marking material at the top grabs the ceiling, while the non-skid GripDisk under the foot keeps the pole locked in position at the floor. Spring Loading lets you lift the pole to tuck the sheeting underneath for easy setup. It also maintains constant tension on the barrier, to compensate for movement at the ceiling or at the floor if the poles are bumped, or if there is a lot of air movement.

PRODUCT FEATURES

- Pro-quality/durability; provides dust-tight seal at the ceiling without tape or staples
- Build a 50 foot barrier in less than 10 minutes; height ranges from 4-feet 7-inches to 12-feet
- Accepts sheeting up to 8 mils thick
- Each SLP6 package contains 6 SLP poles, 6 heads, 6 plates, 6 tethers, 6 Grip Disks
- Meets strict ANSI certification for quality
