

DryMAX BLE LGR DEHUMIDIFIER

BLUETOOTH-ENABLED

The **Phoenix DryMAX BLE** is a Bluetooth enabled, large category, LGR dehumidifier. This allows readings to be taken in seconds with the DryLINK® app. We also have an upgrade kit available for your existing DryMAX dehumidifiers which will add Bluetooth functionality. The Phoenix DryMAX BLE includes a new style condensate pump with a three-year warranty on the pump.

DryMAX BLE Bluetooth-Enabled LGR Dehumidifier

BENEFITS of using the Bluetooth features built into DryMAX BLE

Overall

- Take daily readings in seconds
- Readings data logged every 15 minutes
- Access previous readings if you cannot make it to the jobsite
- Will not allow your tech to take a reading while in defrost (uses nearest good reading)
- When claimed in DryLINK the equipment type, manufacturer, model, and serial number are automatically loaded into the app.
- Calibrate your inlet and outlet sensors in DryLINK

REMOTE MONITORING - (Requires DryPHONE)

- Take daily readings remotely
- Monitor the jobsite remotely
- Prioritize your site visits based on remote readings
- Bill for remote monitoring in Xactimate (WTRRM - \$55/day)

ALERTS

- Select users to receive alerts
- Dehumidifier turned off (with DryPHONE)
- Dehumidifier not connected (with DryPHONE)
- High/Low chamber Temp/RH (with DryPHONE)
- GPP slow to decrease with selectable time and GPP (with DryPHONE)
- Filter needs to be changed
- System protection – incoming temperature too high or refrigeration issue
- Reservoir full – issue with pump out, check for kinked hose, etc.

INVENTORY TRACKING

- Last known location shown on a map - no monthly fee
